План за възстановяване и устойчивост

“Pregarni me” Association is fulfilling project No BG-RRP-11.020-0066-C01 “The Invisible children”, part of the procedure ‘Scheme for gratuitous help in two sessions “Creating of Bulgarian productions and coproductions in the sector CTI for their promotion at the European and the international markets for art”’, which is included in the Programme ‘National Plan for recovery and sustainability’.

The Project “The Invisible children” aims to create a cultural product – a book and a film about the life of children without parental care. The project foresees meetings and conversations between writers and such children, during which the children will talk about their dreams, what they want to achieve, about their difficulties, what makes them happy and what makes them sad. Based on these conversations, the writers will pen stories (keeping the anonymity of the children), aiming to show the emotional world of these children, world which is often left unspoken about in discussions about the conditions these children live in.

The stories will be included in a book which aims to, through a cultural product, make the problems and dreams of these children more ‘visible’ for the society.

During the next stage of the project actors will recreate the stories in a documentary, thus aiming to achieve a broader societal engagement about the present and the future of children without parental care.

The general objective of project “Support for the capacity of Association “Pregarni me”, which is to work at a European level and to encourage the international distribution of cultural products, also aims to strengthen the Bulgarian presence at the international cultural market.

The concrete goal of the project “Creating new cultural products in the area of literature and cinema” aims to develop the Bulgarian creative industries through creating cultural products which reflect the contemporary problems in the area of culture and art.

Expected results:

- A published book with stories based on the conversations between the authors and the children.
- A documentary based on the stories
- Distribution and promotion of the book and the documentary.

Total cost: 82,427.02 BGN, out of which the European Union funded gratuitously 74,184.32 BGN.

Period for fulfilling the project: 18.07.2025 – 31.12.2025.
